

Our goal is your satisfaction

We achieve this goal through:

Partnership

We guarantee you a fair and trustworthy partnership. To be a permanently reliable partner is our personal goal for our work and the basis for a sustainable service.

Transport solutions

Loading advisory service and tailor made transport solutions in accordance to your specific needs and desires, complement our customized railway services and railcar packages.

We are happy to assist you in the development of economic, sustainable and environmentally-friendly transport solutions.

Team work

Continuity in our management ensures the stability and the sustainability of our business.

We have experienced employees all over Europe, who specialize in giving expert advice on national and international rail freight logistics.

A compact organizational management structure, quick decision making and a fair performance system drive our motivation and determination.

Internal and external training programs constantly improve the performance and quality of our work.

Quality

Our services and our wagons are subject to continuous quality control and to constantly-developing improvement processes. Naturally, we comply with existing legal standards and specifications.

We develop our services in accordance with documented processes and have them regularly certified according to ISO 9001:2015.

In addition, our maintenance management of rail freight cars is certified according to the current applicable regulations of the Entity in Charge of Maintenance (ECM) in Europe.

Fleet Management

Our core business is the development, procurement and management of wagons on the national and international rail network for transport of dry goods and vehicles.

All information about our wagons are controlled and managed by the internally developed Wagon-Operating-System (WOPS).

We have a customer interface on the Web, which functions as a Customer-Information-System (CIS) to retrieve information regarding the current positions of our wagons.

„The secret of success is the constancy of goal.“
